## Credit Risk in Practice

Introduction by d-fine

The applications of credit risk in the practice of banking institutions are influenced not only by theoretical aspects but also by external factors. Examples of these factors are the quality and availability of data, the architectures of banking institutions and, last but not least, the dictates of the supervisory authority.

Would you like to know more?

Dr Simona Scheit and Dr Matthias Blank, both managers in the consulting firm d-fine, will take a closer look at the practical aspects of working in the area of credit risk in a dedicated lecture.
